

CIMPA IN-SERVICE LIFECYCLE MANAGEMENT

Data Migration Service

Customer benefits

- Seamless transition for business continuity
- Streamlined data management
- Enhanced overall data quality
- Sound trade expertise at your service
- Improved data consistency through automatic data cleaning
- Cost effective approach

Manage data migration throughout your heterogeneous systems

Maintenance and operations data originate from various stakeholders within and outside of your organization.

In this context, data cleaning, preparing data for 'Go Live' or the recurring loading of up-to-date data are critical phases. Even though standards are widely used, the co-existence of various versions and tailoring may hinder information systems interoperability.

Efficient data migration is paramount, specifically for aircraft transfer, the roll-out of a new business information system or any significant change impacting the data flow environment.

Our answer is intelligent data migration for the benefit of your operations.

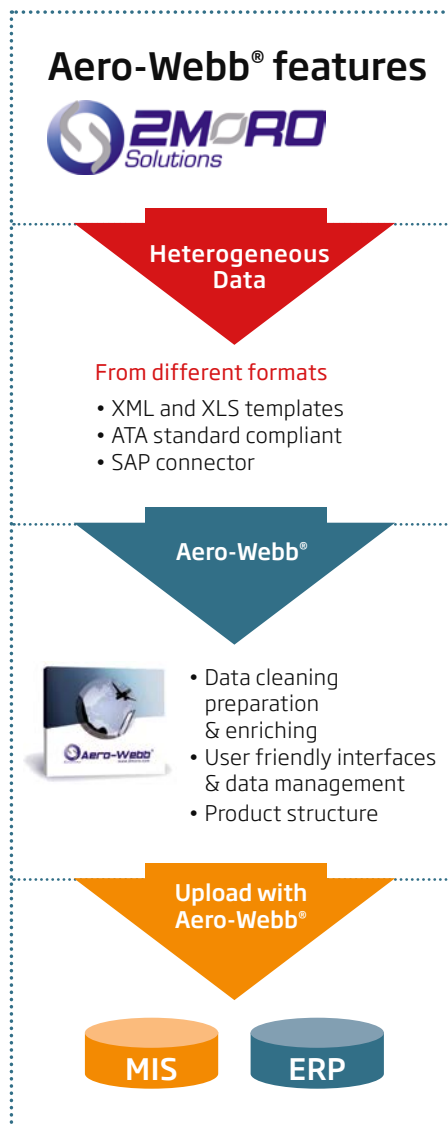

Data migration service

Seamless transition for business continuity

Our service, based on strong aeronautical data expertise and ATA / ASD standards knowledge, encompasses:

- **Data Flow analysis:** Identify where bottlenecks or inconsistencies occur and propose data flow improvement focusing on business issues.
- **Data definition:** Define the appropriate data model when you set up or upgrade your technical data management system
- **Data downloading:** Specify data mapping to new data model. Identify manual and automatic processes aimed at performing the data loading
- **Data control:** Cleaning, checking, updating, enriching. Define and set up automatic tests on your data as per your specific business rules and take advantage of Built-In Data controls. Benefit from a synthetic and operational view on your data validity, integrity, consistency and completeness.
- **Data Uploading:** Use standard and SAP-compliant export.
