

CIMPA IN-SERVICE LIFECYCLE MANAGEMENT

DMU As a portal

The Digital Mock-Up or DMU fully describes the product, usually in 3D, throughout the entire lifecycle

Customer benefits

- Loads a full aircraft in a few seconds. Parts are loaded/unloaded on the fly
- Advanced filtering capabilities : configuration, metadata, boxing, clearance... all being combinable with Boolean logic
- Sharing to other 3Djump users (sections, filters, cameras...)
- Data export
- Flexible (data flowing through web services)

Drawing on its in-depth DMU expertise and integrating new 3D view and convert technologies, CIMPA can now provide the full digital mock-up of a whole aircraft, through a complete toolset integrated into the existing aircraft IT environment.

Thanks to this cutting edge technological expertise, this new portal enables to upload the full model, look for one or several particular part and gather highly complex information with great accuracy.

REDUCED UNCERTAINTY

Acceleration of information exchange with more accurate information

CLEAR WAY FORWARD

The digital mock-ups provide all relevant information about structures and is used as a reference that contains all system elements

ADAPTABLE

Can be completed by the implementation of business use cases

Our turnkey offer for specific challenges

Maximise fleet or asset operations efficiency with our in-service support

Our in-service lifecycle offer focuses on maximising operations at optimal cost without compromising on safety. We optimise the information systems interfaces for maintenance and flight operations with end-to-end innovative solutions:

- A unique in-service solution based on advanced technological bricks assembled together to your requirements.
- Accelerating the exchange of accurate structural damage information.

These services are intended for OEM customer services, airline companies, MRO (Maintenance Repair Overhaul) companies, airports, fleet operators and asset operators.
