

PARTNERSHIP & EXPERTISE

CIMPA and FLATIRONS sign a partnership agreement for the integration of CORENA Suite

FLATIRONS®

- CIMPA provides integration services and business expertise on CORENA Suite solutions
- FLATIRONS provides software solution and expertise to support the integration of the PLM technologies.

CORENA Suite is a family of products dedicated to the unique challenge of managing S1000D or iSpec 2200 content across the full content lifecycle

We are pleased to announce that CIMPA and FLATIRONS have just signed an agreement to strengthen their collaboration on the CORENA Suite of products on the French market. CORENA Suite solutions help large asset manufacturers produce interactive technical publications to support civilian and defence program requirements. They also help operators optimize large asset utilization and productivity thanks to single-system access to multi-vendor maintenance data.

CIMPA is now able to integrate and extend CORENA Suite solutions to allow OEMs to seamlessly reuse their PLM data to create interactive, mobile maintenance publications for access by customers or internal staff.

About CIMPA

CIMPA offers Product Lifecycle Management (PLM) services for the aerospace and defence industry as well as automotive, energy and transportation. CIMPA's expertise lies in four main domains: Consulting, Integration, Business Processes and Support & training. These services, based on comprehensive expertise on PLM technologies and related processes are aimed at industrial manufacturers and operators. A key player in PLM within Airbus, Airbus Group and other major manufacturers, CIMPA is the PLM subsidiary of Sopra Steria, a European leader in digital transformation.
