# Machine Connectivity & IIoT

## Benefits

### Solution

- Connectivity of industrial facilities
- Data capture based on business needs
- Securing the industrial network architecture
- Remote maintenance solution

### Innovation

Solutions and technical architectures adapted to the entire workshop.

### Added Value

- Optimisation of production and improvement of the overall rate of return
- Cost reduction

### The +CIMPA

- Strong experience in digitalisation of industrial workshops
- Ability to capture data from machines

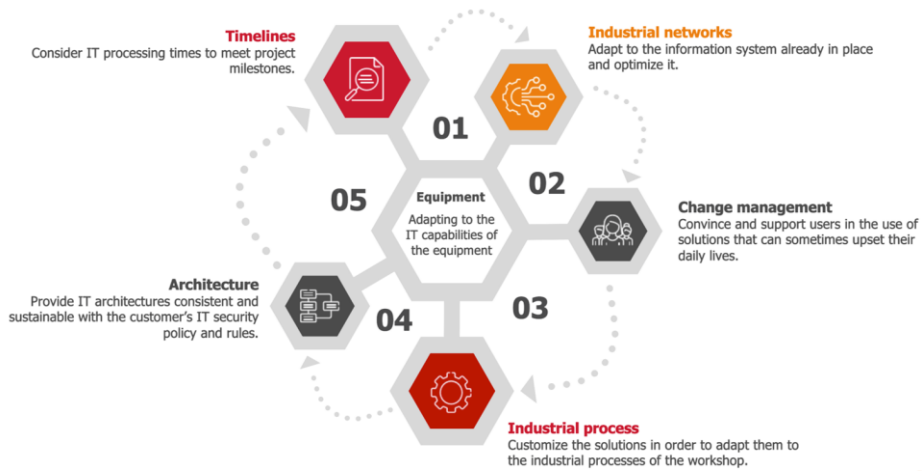

**Connect through industrial network shopfloor assets to allow data exchange with the information system.**

**Digital continuity** is essential for the success of your industrial projects. It is the backbone of our offer, in which we provide such services as the integration of the MES system, digitalisation of workshops or **machine connectivity**.

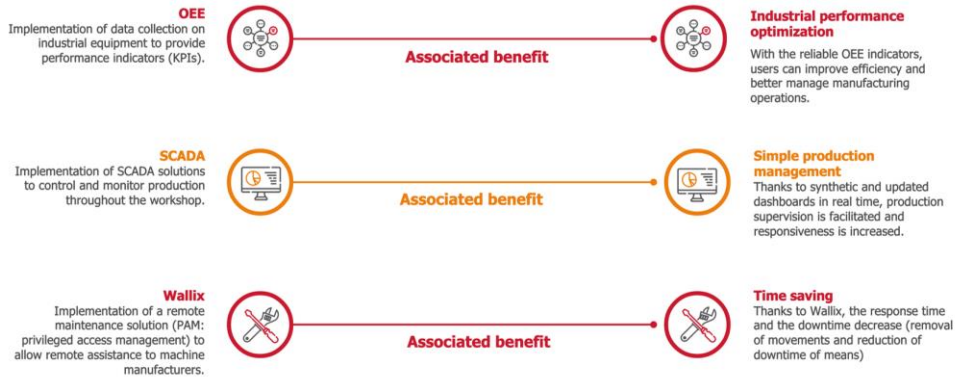

We help you to identify, capture and transmit **machine data automatically**. The relevant provisioning will enable exploitation in high level applications.

Data must be collected in compliance with the rules of **cybersecurity**.

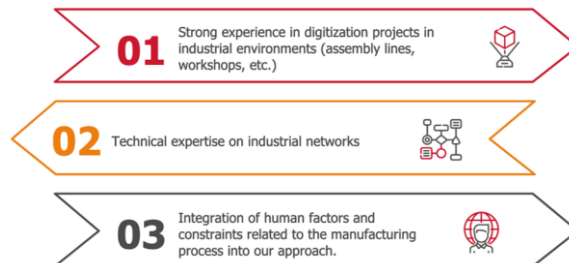

## YOUR CONTEXT

## OUR APPROACH

## OUR METHODOLOGY

### About CIMPA

A major well-known PLM (Product Lifecycle Management) player, CIMPA offers its customers guidance and support with their transformation projects in the aerospace, defence, automotive, transport and energy sectors. Our mission at CIMPA is to give our customers a competitive edge by improving the efficiency of their operations throughout their product lifecycle.

We offer comprehensive Consulting, Information System Integration and Business Process services. Our portfolio covers all phases of a product or asset lifecycle, from the creation or optimisation of a PLM strategy to the deployment of tools, processes and methods in addition to the training and support of users.
